

NEWS RELEASE

SECO/WARWICK S.A. STARTS PRODUCTION OF THREE (3) VACUUM FURNACES FOR MOTOR SICH JSC, UKRAINE

For Immediate Release

July, 2010

Swiebodzin, Poland –

SECO/WARWICK S.A. starts production of three (3) vacuum furnaces for Motor Sich JSC, Ukraine. All furnaces are horizontal front-loading vacuum furnaces:

- Type 10.0VPT-4022/24HV – high pressure gas quenching furnace incorporated with high vacuum pumping system
- Type 10.0VPT-4035/36HV – high pressure gas quenching furnace incorporated with high vacuum pumping system
- Type 2.0VP-4056/60MHV – high vacuum furnace incorporated with all metal hot zone

They are of a compact design with an internal re-circulation blower and heat exchanger, requiring minimum floor space.

The furnaces 10.0VPT-4022/24HV and 10.0VPT-4035/36HV are designed for quenching and homogenizing of turbine blades from heat-resistant alloys and parts of aero-engines from corrosion-resistant steel and structural steel.

The furnace 2.0VP-4056/60MHV is designed for annealing of parts and units from titanium alloys.

The Zaporozhye **Motor Sich** Public Joint Stock Company is among the largest in the world enterprises manufacturing engines for airplanes and helicopters as well as industrial gas turbine installations. It is the leading machinery company in Ukraine which has strong position on the market and solid financial base due to using of advanced aerospace technologies. Company has integrated manufacturing cycle for their products including complete set of metal processing equipment. Company permanently upgrades their manufacturing facilities by purchasing of equipment from the world-leading suppliers.

For more information, please visit www.motorsich.com

SECO/WARWICK Worldwide manufactures industrial heat processing equipment including aluminium heat treat furnaces, vacuum furnace technology, atmosphere generators and

aluminum reverb melting and holding systems, high temperature sintering etc. SECO/WARWICK provides heat treating equipment and services worldwide for customers involved with primary aluminum, aluminum recycling, automotive, aerospace, commercial heat treating, fuel cells, HVAC, electronics, lighting, medical equipment, nuclear applications etc.

The globally integrated organization includes SECO/WARWICK Corp. in the USA, SECO/WARWICK S.A. and ELTERMA S.A. in Poland, SECO/WARWICK China and SECO/WARWICK Allied Pvt. in India. The company has over 600 employees worldwide and is an industry leader in industrial heat processing equipment and processes. More information can be found at www.secowarwick.com.pl
